DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to an apparatus used in combinatorial chemistry.

Group II, claim(s) 6-12, drawn to a process for detecting a chemical reaction.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 1 is anticipated e.g. U.S. Patent No. 6,576,906 to Archibald et al., which disclose an array of zones upon which reactions can take place and thin films (122) may be supported and IR radiation source that reflects off the thin IR reflective layer (126) to a detector which measures the reflectance. Since the recited structure does not make a contribution over the prior art, unity of invention is lacking and restriction is appropriate.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). A telephone call was made to Burke M. Halldorson on 3/20/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
